

WORK BARGE K10030 *Multipurpose lifting solution*

The "K10030" multipurpose work barge is the perfect combination of workspace optimization and comfortable living. The K10030 can be deployed on projects that require a large variety of operational scope of work. With its shallow draft it can easily operate in near coastal waters and with its stable seagoing behavior it can also perfectly be deployed in further offshore operating area's as well.

Barge K10030 is equipped with large underdeck storage facilities for both salvage equipment and dry storage. In addition to this storage space it also features a fully equipped below deck workshop and well spacious storage freezer and refrigerator containers.

The K10030 can be equipped with a HS8200 HD or HS8300 HD crawler crane depending on heavy lifting requirements of the project.

An all round fit for purpose work barge for any project.

BARGE K10030

Length overall	100.584 [m] (330'0"-)
Breadth	30.480 [m] (100'0"-)
